

Top 7 Reasons to Use the New Structured *Silver*

- 1. New Technology.** New technology has made structured silver extremely more effective than the old colloidal or ionic silvers. The new silver requires very small amounts, is non-toxic, and is extremely safe. It even outperforms silver aquasols from last decade by a wide margin.
- 2. Scientifically Supported.** Numerous lab reports and research studies have documented the benefits of using silver. In fact, scientists have found that structured silver can destroy 99.9% of all bacteria, viruses, mold, fungus and other pathogens. It begins to destroy pathogens within the first 15 seconds.
- 3. Super-Flexible.** Structured silver can be used inside the body (internal), as well as on the skin and in the orifices (external). Structured silver can also be used as an effective household disinfectant, much like bleach or other cleaners - only it's much safer!
- 4. Quick Kill Time.** Structured silver can be effective in just a few minutes. Research shows that exposing silver to most pathogens (including fungus and mold) for only 3-6 minutes will kill them.
- 5. Inexpensive.** When you add up the cost of doctor visits (and the time to see the doctor), prescription medications, and other factors involving "conventional" health care, structured silver is a tremendous value.
- 6. Emergency Preparedness.** Because structured silver is inorganic with no chemicals or other additives, it can be stored for years at a time. Several agencies and organizations have recommended the use of silver as a potential agent in the fight against bioterrorism.
- 7. Extremely Safe.** Research, testing and long-term use prove that structured silver is completely safe for everyone, including children and the elderly.

A History of Silver

- 2000 BC Silver mentioned in Egyptian writings
- 500 BC Greeks, Romans use silver vessels for water purification
- 500 Silverware protects the wealthy from the full brunt of the plague
- 1800 Doctors used silver sutures in surgical wounds
- 1900 Pioneers and frontier settlers use silver coins in their drinking water and milk to prevent spoilage
- Silver products are being developed and marketed commercially
- Silver is used to combat wound infections during WWI
- Silver is used widely in hospitals
- Several commercial airlines use silver water filters
- 2000 NASA selected silver-based system for space shuttle
- Improved silver products rise in popularity
- 2013 New, superior structured silver technology developed in both liquid and gel form

Silver: A Fighting Chance

Antibiotics are failing at an ever-increasing rate, healthcare costs are spiraling out of control and bioterrorism is a constant threat. In addition, e-coli outbreaks, bird flu cases and other potential pandemics are poised to create havoc on North Americans' health and economy. New structured silver offers its uses a fighting chance.

- Pathogens such as viruses, bacteria and fungi can inflict terrible damage in the body.
- Antibiotics are not only failing, but also helped create new strains of superbugs.
- Silver, a simple, safe and effective alternative exists.
- Silver products have been safely used as antimicrobial agents.
- A new and vastly improved type of structured silver solution has been developed.
- Structured silver is non-toxic, safe and extremely effective against a wide range of pathogens.

How Structured *Silver* Works

Metallic silver gives off ultraviolet radiation in a narrow wavelength. The narrow wavelength energy radiated from silver destroys the membranes of pathogens and damages their DNA beyond repair. The silver also interferes with the energy sources of bacteria, viruses and other microbes. Ultimately, it kills bacteria and reduces viral replication.

WITHOUT SILVER

WITH SILVER

What Experts Are Saying

“Aguasols of the last decade, and now the even more effective structured alkalinized silver (SILVER), have presented in both basic research and clinical experience as remarkable therapeutics in many diverse clinical situations. SILVER demonstrates antibacterial, antiviral and antifungal effects for virtually every surface and tissue of the body. SILVER is both highly effective clinically and is without toxicity. These properties make SILVER a preferred therapeutic for treating patients, healthcare volunteers and team members in international missions and humanitarian efforts.”

– Dr. Bryan Frank, MD, President of Global Mission Partners

“Few things in life are as cut-and-dried as the fact that silver is completely safe when used within normal limits.”

– Dr. Herbert Slavin, MD, Director of the Institute of Advanced Medicine in Lauderhill Florida

“At the Silver Health Institute we’re identifying new and improved forms of silver. Not just aquasols, not just colloids or ionics, but actual structured silver with benefits like alkalinity, so that your body can use it every single day. [...] In fact, these silvers are being studied at the pharmaceutical levels. A pharmaceutical company called Nelson Labs has tested them and found that **the new and improved structural alkaline silver outperforms all the rest**. This is significant because it’s a silver designed for your body to be used every single day.”

– Dr. Gordon Pedersen, ND, PhD, Medical Director of the Silver Health Institute

“Over the past few years, several new studies have demonstrated the fact that silver is one of the most effective agents in the battle against MRSA and other deadly antibiotic-resistant super pathogens...”

– Dr. Joseph Mercola, DO, Best-Selling Author

“What is the future? The new vectors for designing water-based products for use in major industries and for maintaining health or causing healing are just legion now. [...] The sky is the limit. [...] Structuring of water by colloidal silver or by radiation now becomes possible for the human race, and we think it is the most benign, easiest vector to use for many, many processes.”

– Dr. Rustum Roy, PhD, Professor at Pennsylvania State University

“Over time, the well-established indications for the effective use of silver were for water purification, wound dressings for the promotion of healing, the prevention and treatment of infection, dental hygiene ... eye conditions ... and other infectious conditions.”

– Dr. J. Wesley Alexander, MD, Sc.D., Professor Emeritus of Surgery at the University of Cincinnati

“Anything in excess has consequences. Common substances like table salt and aspirin are harmless with normal use, but excessive intake can become toxic and even life-threatening. With normal responsible usage, silver supplements are entirely harmless to humans.”

– Dr. Jeffrey Blumer, MD, PhD, Former Director of the Center for Drug Research

18 Ways To Use Silver

	2-3 Drops	2-3 Sprays	1-2 Fine Mist/Gel	1-2 tbsp	1x Day	2-3x Day	As Needed	Notes
INTERNAL USE	Daily Disinfectant			x		x		For special circumstances, serving can be doubled
	Immune Support			x	x		x	Take 3-5 days or more if needed
	Digestive Support			x	x		x	Take 3-5 days or more if needed
	Urinary Support			x	x			Take as long as needed
ORIFICE USE	Voice Spray		x	x			x	Use spray bottle 1-4 sprays up to 10 times daily
	Mouthwash			x		x		Gargling for six minutes will maximize effect
	Ear Health	x			x	x		Keep ear pointed upwards for ten minutes to allow silver access into ear cavity (make sure ear canal is full)
	Eye Health	x			x	x		Keep liquid in eyes for up to six minutes for optimal exposure
	Nasal Spray			x	x		x	Use atomizer sprayer 1-10 times daily
Throat Spray/Gargle				x		x	Gargle for six minutes (swallow solution); use every two hours for strep, twice daily thereafter	
EXTERNAL USE	Vaginal Wash		x	x	x			Use gel on external vaginal area; use atomizer to administer liquid in vagina
	Skin, Foot Disinfectant	x	x	x			x	Use up to six times daily; can soak entire foot daily
	Hand Gel Wash		x	x				Use full strength; works up to 4 hours
	Diaper Rash	x	x	x				
	Face Wash			x	x		x	Can use daily
